Data Science undergraduate at BINUS University with a CGPA of 3.90/4.00 and hands-on project experience. Proficient in data analysis, machine learning & deep learning model development, and ETL pipeline deployment. Passionate in using data to find practical approaches to solving real-world and business problems.

## EDUCATION

**Bina Nusantara University (BINUS)** – West Jakarta, DKI Jakarta

*Bachelor of Computer Science, Data Science Program*

Expected Graduation: May 2028

- **CGPA:** 3.90/4.00
- **Relevant Courses:** Algorithm Design & Analysis, Artificial Intelligence, Bayesian Data Analysis, Big Data Infrastructure & Technology, Data Management & Organization, Data Mining & Visualization, Data Security, Data Structures, Deep Learning, Machine Learning, Model Deployment

**Santa Ursula BSD High School** – South Tangerang, Banten

*Mathematics & Natural Sciences Major, K-13 Curriculum*

July 2021 - June 2024

- **Grade:** 89.61/100
- **Extracurriculars:** Coding Club, Goethe-Institut PASCH, Animation Club, Badminton Club

## EXPERIENCE

**BINUS Student Advisory and Support Center (SASC)** – West Jakarta, DKI Jakarta

*Senior Duta Binusian Mentor*

March 2026 - August 2026

- Mentored 4 students across different academic levels, including peers and senior students
- Adapted mentoring strategies to individual learning styles and academic needs

*Duta Binusian Mentor*

September 2025 - February 2026

- Mentored 3 peers to achieve GPAs above 3.00 through academic support and tutoring
- Tracked mentee progress through structured reports using Excel and the Student Learning Partner system

## PROJECTS

**Credit Score Classification ETL Pipeline & AWS Deployment**

*Python, AWS, FastAPI, Streamlit*

- Built an end-to-end ETL pipeline for credit score classification, including data cleaning, preprocessing, and transformation
- Deployed the inference ML pipeline on AWS SageMaker, integrated with FastAPI and Streamlit for user interactivity

**Automated Odd–Even Traffic Monitoring Using Computer Vision**

*Python, TensorFlow, HTML, CSS, JavaScript*

- Developed a YOLOv8 CNN-based computer vision pipeline that automatically detects license plates, reads them, and identify odd-even traffic violation, achieving 95% detection accuracy and 0.975 mAP@0.5
- Built a web-based interface supporting image uploads and live camera input for real-time traffic monitoring

**BabyBoost: Parenting Website with Machine Learning-Based Stunting Prediction**

*Python, Figma, HTML, CSS, JavaScript*

- Developed an interactive parenting website for child growth monitoring, nutrition information, and parenting guidance.
- Deployed a Random Forest stunting prediction model with 96% accuracy, integrated to the website using Pickle

## CERTIFICATIONS

- **AWS Academy** – Cloud Architecting (2026), Cloud Foundations (2026), Machine Learning (2026)
- **DataCamp** – Associate Data Engineer Certification (2026)
- **Nvidia** – Fundamentals of Deep Learning (2026)
- **Dsarea** – Data Analytics and Visualization Bootcamp (2026)
- **Kaggle** – Data Visualization (2026)
- **Beelingua** – Market Research & Business Communication (English CEFR C2.2) (2025)

## ORGANIZATIONS

**Data Science Club at BINUS University** – West Jakarta, DKI Jakarta

*Activist in Education & Development Department*

February 2025 - Present

- Taught monthly workshops about data science with hands-on Python and R to 30+ participants
- Collaborated in a 10-person team to coordinate events and create learning materials for 50+ organization members

## SKILLS

**Data Analytics:** Python, SQL, Excel, PowerBI, BigQuery, R

**Data Science:** Scikit-learn, TensorFlow, PyTorch, Keras, Spark

**Development:** Git/GitHub, Docker, C, HTML/CSS/JavaScript, Figma

**Languages:** English (*fluent*), Indonesian (*native*), German (*basic*)
